Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant discussed the differences between the present invention and the prior art of Stone. In particular, Applicant stressed the password operations performed upon multiple passwords associated with multiple data sources. Clarifications of at least these aspects will be submitted with subsequent amendments. No agreement as to allowability or the overcoming of Stone was reached, however, the Examiner felt the interview to be productive in the expeditation of the present invention.
